The Marin County Luxury Home Market

Spring 2021 Report

Statistics are generalities, essentially summaries of widely disparate data generated by dozens or hundreds of unique, individual sales occurring within different time periods. They are best seen not as precise measurements, but as broad, comparative indicators, with reasonable margins of error. Anomalous fluctuations in statistics are not uncommon, especially in smaller, expensive market segments. Data from sources deemed reliable, but may contain errors and subject to revision. All numbers are approximate. Data from MLS, but not all listings or sales are reported to MLS.

Marin County Long-Term Luxury Home Sales

12-Month Rolling Sales Volumes since 2011*

↔ House Sales - \$3,000,000 to \$4,999,999

The luxury home market is sensitive to economic conditions, such as the stock market, which peaked in 2015, 2018, early 2020, and early 2021. And, of course, the pandemic was a huge factor in the market, starting in spring 2020.

* Each data point reflects 12 months of MLS sales: Average monthly sales volumes = 1/12 of these compiled figures. Using 12-month rolling data mostly removes the effect of seasonality on sales.
